

## NTV Mk 1 SNAKEFIGHTER

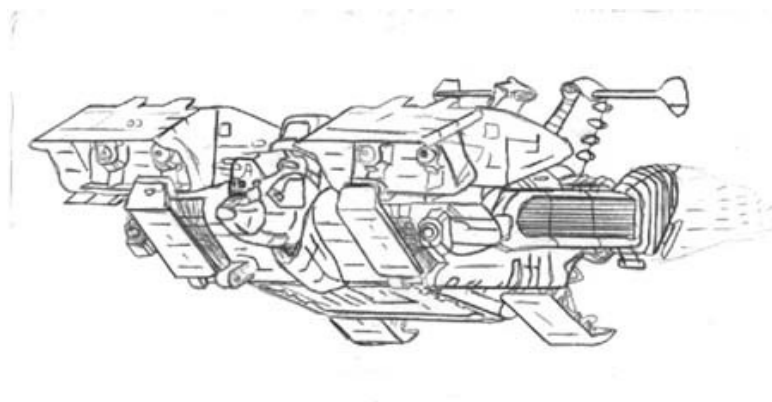

Nicknamed the Snakefighter by its design team, the NTV Mk1 is a unique “super dropship” in that it provides a platoon with interstellar mobility and relative self-sufficiency. Its flanks dominated by enormous thruster pods, the Snakefighter is capable of rapid atmospheric maneuvering, high sublight velocity in space, and substantial payload hauling.

Standard crew complement is 10, comprising a pilot, copilot, weapons officer / navigator, and engineer. In case of “crew attrition, “ (ie casualties), much of the ship’s functions can be handled by relatively inexperienced personnel, due to a high level of automation and user-friendly design. The living quarters are spartan, and the lack of bunk space forces the crew members to rotate their eating and sleeping. The medlab is fairly basic, intended for patching up non-lethal combat injuries.

The main loading ramp is divided into two smaller loading ramps, which can be operated independently of each other.

A crane in the ceiling of the cargo bay aids vehicle maintenance and can be used for storage.

The tactical command post is similar to a standard APC interior, with maps, monitors, and a sliding command chair.

### STATISTICS

Variant	Body	WT	Armor	MV	Move	Mach	Orbit	SR
NTVMk1	10	250	4	-5	10	2	15	100

**Communication range:** 10 000, FTL

**Crew:** 1 Pilot, 1 Co-Pilot, 1 Gunner, 1 Engineer. Life support for up to 100 personnel. Bunks for 30 passengers.

**Maneuverability:** +4 dodge of guided missiles.

**Additions:** Fire Retardant, Flares, Raft, Emergency Rations, Sleeping Bags.

**Evacuation:** 2 EEVs, 120 Parachutes

**Armament package:** Two Pistols. 4 Smart Guns, 30 Pulse Rifles 20 Flame-throwers, 200 Pistols, 30 Shotguns, up to 30 other weapons. May be replaced with higher TL weapons.

**Range: Atmospheric:** 50 000 km

**Orbital:** Unlimited

**FTL:** 4 ly

**FTL Speed:** 0.5 ly/day

**Cargo Slots:** 2

**Hardpoints:** 12

**Basic Armament:** 2x25 mm "Gargoyle" Gatling, 16x120 mm rockets, 8xAGM-220 missiles, 64 x 150 mm rockets, 2 x TSAM Missiles, 3xAIM-90 missiles, 2 XIM-28A missiles
